

December 7, 2015

To Cherry Hills North Metropolitan District:

This letter is to notify you of our Notice of Claim for Injury/Damages per Colorado Statue 24-10-109 at the home of Barry and Diana Capoot, 4081 S Dahlia Street, Englewood, CO 80113.

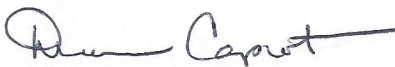

On Friday June 12, 2015 after hours of heavy rains, sewage backed up into our home and 5 other homes in the Mansfield Heights Water & Sanitation District (Mansfield) and 1 home in the Hillcrest Water and Sanitation District (Hillcrest). Our home and the others impacted are directly along the Hillcrest outflow line which your sanitation district connects to.

It is believed that the infiltration of rainwater into all the sanitation districts that connect to the Hillcrest outflow line caused the outflow line to completely fill with sewage and rainwater causing the system to become a pressure gradient system. In order to release that pressure, sewage flowed into the 7 homes affected. The sanitation districts which connect to the Hillcrest Outflow line are Mansfield, Hillcrest, Cherry Hills North Metropolitan District, Devonshire Sanitation District and Cherry Hills Village Sanitation District.

As a result of the above, on the morning of June 12, 2015 we had over 2 feet of sewage forcefully back into our basement. Drywall, all doors and trim, carpet and furniture and other real property were destroyed. A hazmat/restoration company was required to remove the sewage and all the affected items. Extensive cleanup and reconstruction resulted and unreimbursed costs incurred to date are over \$23,600.

Please acknowledge receipt of this Notice of Claim.
